

SUMMARY

Second-year BSc Information Technology student with hands-on experience building backend applications using Core Java, JDBC, Hibernate, and the Spring Framework. Skilled in designing database-driven systems and integrating AI-based services (Spring AI, Groq API, Deepgram API) into full-stack applications with React front-ends. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, and relational database design. Seeking an internship opportunity to contribute to real-world backend development and grow as a Java developer.

EXPERIENCE

Student - Self-Directed Backend Development Training	Jul '25
Shri GPM Degree College of Science and Commerce	Sakinaka, Maharashtra (On-site)
- Pursuing B.Sc. in Information Technology. - Learning Java, Spring Boot, and Hibernate with MySQL. - Building real-world backend projects independently and as part of coursework.	

PROJECT

College Voice Assistant Chatbot
- Built an AI-powered voice assistant chatbot using Java, Spring Boot, and Spring AI. - Integrated Groq API for intelligent query responses and Deepgram API for speech-to-text processing. - Designed to answer student queries and provide college-related information in real time. - Developed the frontend using React, JavaScript, HTML, and CSS for a seamless user experience.

Student Management System
- Built a backend application using Java and JDBC for direct database connectivity. - Implemented CRUD operations to efficiently manage student records. - Designed a relational database schema to store and retrieve student information.

Note Taker Application
- Developed a note-taking web application using Servlet, Hibernate, and JSP. - Implemented MVC architecture for clean separation of concerns. - Enabled users to create, update, and delete notes with persistent database storage.

EDUCATION

Bachelor of Science - Information Technology	Jun '25
University of Mumbai (Shri GPM Degree College of Science and Commerce)	

SKILLS

Languages: Core Java, Java 8, SQL

Frameworks: Spring Framework, Hibernate

Database Access: JDBC, Hibernate/JPA

Concepts: Object-Oriented Programming (OOP), Collection Framework, Multithreading, Data Structures & Algorithms

Soft Skills: Communication, Problem Solving, Teamwork, Time Management, Adaptability

Languages Known: English, Hindi
